

Momentum Investments Target Factor Portfolio Range

Momentum Investments Target Factor 4 Portfolio

Factsheet at 28 February 2026

Target: CPI + 2% to 3%

Investment horizon: Four years

Investments managed by: Momentum Multi-Manager (Pty) Ltd

Momentum outcome-based investing philosophy

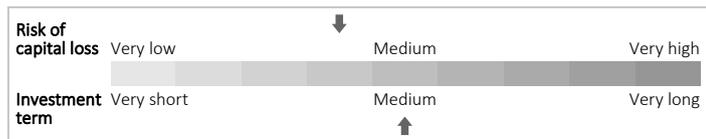

Investment success is about consistently maximising the probability of you achieving your investment goals – whether that is to preserve capital, generate an income stream in retirement or grow wealth within the parameters of a certain risk profile. In response to the ever-evolving investment landscape, we have constructed a range of outcome-based solutions that set their sights beyond mere benchmarks and instead focus on the things that matter the most to you – ensuring we maximise the probability of you achieving your investment goals. Outcome-based investing is about placing your goals at the centre of our investment process.

Investor profile and investment strategy

This portfolio is aimed at investors who are in the pre-retirement and consolidation phase of investing. It has a short- to medium-term investment horizon and, therefore, the aim is to maintain an average exposure of 43.5% to growth asset classes (local and global equities and property). The remaining exposure is to asset classes that should preserve the purchasing power of the capital accumulated. The portfolio consists of the full universe of asset classes, including global investments of up to 45%. The strategies used include passive, enhanced passive, smart beta and select active investment strategies. The allocation between asset classes is actively managed, taking the market environment into account. Through the optimum selection of asset classes, the probability of achieving the outcome is maximised within acceptable risk parameters. It is suitable as a stand-alone portfolio in retirement products, where compliance with Regulation 28 is specifically required.

Portfolio information

Launch date:	August 2011
Benchmark:	Composite: Local equity 20%; Local property 2.5%; Local bond 30%; Local cash 17%; Global equity 17.5%; Global property 3.5%; Global bond 5%; Global cash 4.5%
Target:	Inflation plus 2% to 3% over four-year rolling periods
Reg. 28 compliant:	Yes

Capitec Bank Hldgs Limited	0.92%

The 10-largest instruments at 27 February 2026, looking through all asset classes held.

Quarterly portfolio commentary for Q4 2025

South Africa's (SA) economy is expected to have expanded by around 1.2% in 2025, with growth projected to improve further to about 1.6% in 2026, marking a steady upward trend from the 0.5% outcome recorded in 2024. Local inflation is expected to drift slightly higher in 2026 due to base effects. But at an expected average of around 3.5% it should remain comfortably within the new 3% target with a ± 1 percentage point tolerance band, which should provide scope for the SA Reserve Bank (SARB) to support growth by cutting interest rates further without compromising price stability. The rand is supported by firmer domestic fundamentals, ongoing terms-of-trade benefits from the combination of firm gold and platinum prices and a low oil price, as well as a soft United States (US) dollar.

SA asset classes outperformed global assets in December and the 4Q25, partly due to commodity price-induced rand strength. Amongst global assets, equity returns outpaced those from fixed income in both December and 4Q25 as the Fed continued to cut interest rates, with global property providing the worst returns of all asset classes. Of all the main DM equity markets, only Europe gave higher returns in December and 4Q25 than EM equities. Within SA asset classes, nominal government bonds provided slightly higher returns than equities and ILBs in the fourth quarter, with SA cash the clear return laggard. Falling local policy rates and bond yields made SA financials the equity sector winner in the fourth quarter, although sharp commodity price rises (particularly PGMs) also supported the resources sector. In sharp contrast, SA industrial shares gave negative returns in the quarter. SA listed property was the best-performing local asset class after the platinum ETF in 4Q25, driven by falling bond yields and positive profit momentum in the sector.

The portfolio benefitted from the allocation to local equity as well as local bonds and local property, delivering a return of 4.9% , which was ahead of the benchmark return of 4.7% for the quarter.

Notes

The benchmark for the local equity component was changed on 1 November 2025 from the FTSE/JSE Capped SWIX All Share Index (J433T) to the FTSE/JSE Capped All Share Index (J303T); Local equity returns shown in the Index returns table are comprised of J433T until 31/10/2025 and J303T thereafter.

Changes were made to the strategic asset allocations on 1 July 2023.

The benchmark for the local property component was changed on 1 October 2021 from the FTSE/JSE SA Listed Property Index to the FTSE/JSE All Property Index.

On 1 November 2020, the real return expectation for this portfolio was revised from inflation plus 4% to a range of inflation plus 2% to 3%.

Changes were made to the strategic asset allocations on 31 October 2020.

Disclosures

The investment policy is underwritten by Momentum Metropolitan Life Limited, which is a registered insurer under the Insurance Act, 18 of 2017. This investment portfolio is administered and managed by Momentum Multi-Manager (Pty) Ltd, an authorised financial services provider (FSP No. 19840) under the Financial Advisory and Intermediary Services Act No.37 of 2002 (FAIS Act), as may be amended and/or replaced from time to time, and a part of Momentum Group Limited, rated B-BBEE level 1.

Under no circumstances shall Momentum Metropolitan Life Limited, its affiliates, directors, officers, employees, representatives or agents (the "Momentum Metropolitan Parties") have any liability to any persons or entities receiving the information made available in this factsheet for any claim, damages, loss or expense, whether caused by Momentum Metropolitan Life Limited or the Momentum Metropolitan Parties' negligence or otherwise, including, without limitation, any direct, indirect, special, incidental, punitive or consequential cost, loss or damages, whether in contract or in delict, arising out of or in connection with information made available in this factsheet, whether relating to any actions, transactions, omissions resulting from this information, or relating to any legal proceedings brought against you as a result of this information, and you agree to indemnify Momentum Metropolitan Life Limited and the Momentum Metropolitan Parties accordingly.

Investment returns for periods exceeding one year are annualised. All returns quoted are before deduction of fees, but after the deduction of performance fees on global underlying investments (where applicable). All returns are daily time-weighted returns. The return for the global component of a portfolio is generated at month-end using the global component's last known price. The return for Consumer Price Index (CPI) is to the end of the previous month.

For investments in collective investments schemes (CIS), please refer to the minimum disclosure document (MDD), which is available from the respective CIS manager. The MDD contains important information relating to investment in the respective CIS.
